HOW TO CHOOSE A POST PROTECTOR

Example: Model **5208**

52=3" column, **08**=post protector height (8").

Example: Model **6236** is a Post Protector that has a 36" height and fits a 4" column.

62=4" column, **36**=post protector height (36").

1. Determine which height is required of your application. Other special heights available. Note: height includes $\frac{1}{4}$ " thick base plate.
2. Determine the size of the column of your application. Other special widths available. 3" column base plate opening is 3-3/8" and 4" column base plate opening 4-3/8".
3. Determine if there will be any obstructions preventing proper anchoring to the floor. Base plate is 7-5/8" wide x 6" deep.
4. Determine what type of finish is required for your application. EGA Yellow is standard. Optional colors available. If you have a special color requirement, you can provide EGA with a chip sample for a color match or RAL Color Number.
